Team Lancaster Gate

Hristo Markov: Front and Back End developer.

Josh Thomson: HTML/CSS Developer, Website Guide.

Bailey Rudd: HTML/CSS Developer

Boyan Yonkov   Designer and Web Developer

Header

- The header runs along the top of the page containing a site logo to the left, and navigation links across. The links are as follows:
  - Home
  - Chapters
  - Team
  - Subscribe
- Putting the mouse cursor over 'Chapters' brings down a list of chapters 1-4, allowing you to select which chapter page to navigate to.
- The 'Subscribe' link also produces a drop down when the mouse cursor is over it. This drop down contains input fields such as first name, last name, email and comments as well as a submit button.

Footer

- The footer contains similar navigation links to other pages on the website:
  - Home
  - Chapters
  - Team Information
  - Subscribe

The subscribe link acts differently on the footer than the header. There is no drop-down menu when you hover the cursor over it, instead it takes you to a subscribe page that has the same functionality has the header's subscribe drop-down.

Home Page

The home page contains information presenting the website and its goals. It also contains an animation 'loading' bar at the top which 'loads' when the page is opened. There is a heading image, and three images of the committee members at the bottom. The images of the committee members grow when the mouse cursor is over them.

Chapters

The chapter pages contain content relating to the topic of the website, along with images relating to that content. Chapter 1 contains animated images that move when the page is first loaded. Each page is consistent in design and has a heading image.

Team Info

The team info page contains a heading image and four different images for each team member's bio. Underneath each image is the information about the team member, and the images are related to their hobbies.

Subscribe

The subscribe page contains:

- First name field
- Last name field
- Email
- Comments
- Submit Query button

Once the information has been filled in and the user has clicked 'Submit Query' they will receive an email confirming that they have signed up.
